

سیستم جمع آوری اطلاعات

■ قابلیت اتصال به ۲۴ دستگاه در قالب یک شبکه اختصاصی

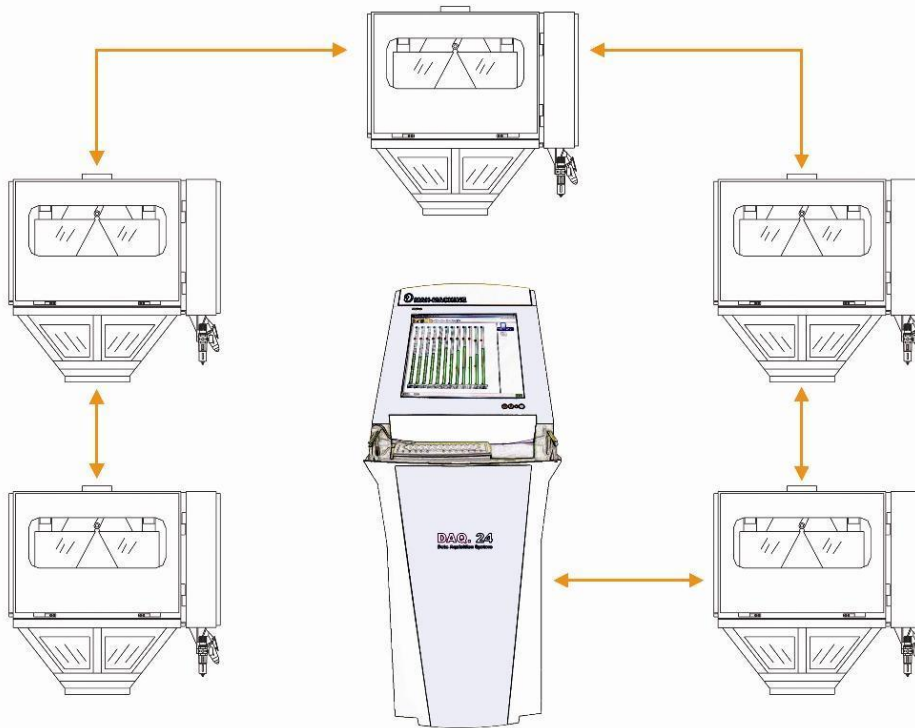

MAH-MACHINE Design & Eng. Co. LTD.
شرکت طراحی مهندسی

DATA ACQUISITION SYSTEM

DAQ. 24

Features:

- ❖ Full duplex scan
- ❖ Using a powerful protocol
- ❖ Date and time base logging
- ❖ Reporting on line graph ,bar graph and text
- ❖ Up to 24 station
- ❖ Information gathering interval 10 sec
- ❖ Using industrial pc
- ❖ Rs485 bus
- ❖ Printable report

FARSHAD

- Unit 4, No. 14, 10th St. Ghaem-Magham Ave., Tehran - IRAN
- Post code: 1586877115
- Tel: 0098 21 88506948
88731937, 88738618
- Fax: 0098 21 88738419

DAQ-24 data acquisition system is a fully data gathering system that can be connected to the mah-machine-made machinery. This system specially work with our online process scale machines(RTM-10,RTM-85) for gathering the line information such as rate and total of material in a factory.

A user friendly software under windows operating system is the vital part of DAQ-24. Any type of report from text to graph can be generated via this software which can be printed easily.

All the information can be review online or offline. There is no limitation on the gathered data and the system can work 24 hours a day and the capacity of the hard disk determine the maximum amount of logged data.

Features :

1. Full and duplex scan
2. Using a powerful protocol
3. Date and time base logging
4. Reporting on line graph ,bar graph and text
5. Up to 24 station
6. Information gathering interval 10 sec
7. Using industrial pc
8. Rs485 bus
9. Printable report
